

# 'There is nothing more permanent than change.' Heraclitus

# TEMP EN

Thinking about a temporary structure is rewarding and fun. Many times temporary structure became emblematic and memorable.

Local relevance through a layered approach:

**LOCAL TRADITIONS** > the pattern of the past cotton industry products

**DEMOGRAPHICS** > ethnic population @ 30% of which 40% <24

**EDUCATION** > schools to be involved in the implementation and use

**SUSTAINABILITY** > use of recycled materials

**AFFORDABILITY** > low-budget materials / techniques & high impact

Our proposal presents a temporary, semi enclosed-environment [TempEn] which will act as a multi-polar social attractor: it groups a variety of spaces of different sizes, shapes and heights, able to accommodate a large variety of activities.

Possible uses:

- School gardens
- Lettable spaces
- Open-air cinema
- Sculpture garden
- Playgronds
- Sport fields
- Events spaces

Spatial organisation:

A nominal area of 100 by 75 meters is covered by a 25x25 meters mega grid of 1.5 x 1.5 meter, 4.5 meter high compacted cars columns.

The roof trellis work is linked to the greater manchester bike recycling initiative.
